Laufendes Bild

<http://192.168.1.27/GetData.cgi>

Standbild

is an internal program that serves the pictures and continually places a jpeg image in the camera's own memory at

...URL/Jpeg/CamImg*.jpg

zB. 192.168.1.27/Jpeg/CamImg0.jpg

where * can be anything or nothing (Why the extra?) On an empty web page place

Umschalten

<http://192.168.1.27/SetChannel.cgi?Channel=2>

Auflösung

<http://192.168.1.27/ChangeResolution.cgi?ResType=1>

<http://192.168.1.27/ChangeResolution.cgi?ResType=2>

Ip Video Server

<http://192.168.1.27/ChangeResolution.cgi?ResType=3>

into the address line of a browser and click go you can change the picture resolution. N must be 0 to 7 and the resolutions (not all tested) seem to be :-

0 - 176*144

1 - 352*288

2 - 320*240

3 - 640*480

Reset

1. DHCP 2. Administrator 3. nix
